

PRESS RELEASE

For Immediate Release – Thursday 3rd March 2011

SLP Progress Update

Thornton Bank Development

SLP Engineering as part of the Smulders group was awarded the engineering and fabrication of one of the jackets for the Thornton Bank offshore wind farm development project and work is progressing well.

Fabrication of the intermediate cable deck is now well advanced and the tubulars that form the main jacket structure are due for delivery by late March through to early April. Minor package orders for tanks, pump and secondary structural materials are placed.

The intermediate deck pictured above in one of SLP's fabrication shops is nearing completion prior to going into the paint shop early April. Once painted the deck will be transported to the fabrication site to await the jacket structure assemblies all geared towards a sailaway date of the end of June. By this time outfitting of the few items in SLP's scope on the intermediate deck will be completed.

PRESS RELEASE

East of England Energy Group (EEEGR) Southern North Sea Conference 24th February 2011

SLP Engineering Managing Director Paul Thomson was among several delegates at this conference to promote the future for local companies in the Gas, Wind and Carbon Capture and Storage fields.

As one of the speakers he was able to re-emphasize SLP's capabilities and give more feedback on SLP post administration as part of the Smulders Group.

For further details visit the EEEGR website at
