

# SLP ENGINEERING LIMITED

## QUALITY POLICY STATEMENT

The aim of the management of SLP Engineering Limited (the Company) is, through continual improvement of company activities, to provide customers with high quality, high reliability products and services in the Company's chosen markets. By following this course of action the Company aims to consolidate and improve its position within the marketplace to achieve the status of market leader.

This document sets out the principle ways and means the Company shall pursue to achieve the required level of Quality Assurance. The system is based on and complies with, but not limited to, BS EN ISO 9001:2008.

The Company is committed to meeting the requirements necessary for certification to BS EN ISO 9001:2008.

The development and implementation of the business process within the Company has my personal commitment and support, reinforced by the commitment and support of the other directors and management team.

The Management Review meetings will be a forum for setting new quality objectives and to review the effectiveness of those implemented at the last meeting. To ensure progress the objectives will be subject to regular monitoring.

The Company operates a fully documented Quality Management System and employs competent personnel to carry out the requirements. This ensures, by continual improvement at every stage of development, manufacture, use of products and services, that the quality and reliability meets the expectation, demands and requirements of our customers.

The implementation of the Quality Management System on a day-to-day basis is the responsibility of all personnel within the Company. This will be monitored by a programme of scheduled internal audits, aimed at assessing the implementation, compliance and effectiveness of the management system. The results of internal audits are reviewed by the Company's management and when necessary lead to systems being reviewed and revised accordingly.-
